

## APPENDIX I

### COMBAT PISTOL QUALIFICATION COURSE PROCEDURES & SCORING

The CPQC requires the soldier to engage single and multiple targets at various ranges using the fundamentals of quick fire.

#### A-1. OVERVIEW

a. For each table of the CPQC, the firer is afforded extra rounds to reengage targets that are missed. During the course, 30 targets are exposed to the firer. However, 40 rounds of ammunition are issued with which to engage the exposed targets. A soldier who can reengage a target with an extra round during the exposure time is just as effective as one who hits the target with one round. The firer is not penalized for using or not using the extra ammunition. All excess ammunition is turned in after the completion of each table and may not be used during subsequent tables.

b. Three magazine changes are required when firing the CPQC, once in Table II and twice in Table V. For safety purposes, one magazine containing one round of ammunition and is loaded first in both Tables II and V. A target appears in front of the firer, and he engages it. Eight seconds later, another target appears. During the eight-second delay, the firer must reload the weapon and be prepared to engage the next exposed target. There are no commands from range personnel or coaches for the magazine change. If the firer fails to reload his pistol in time to engage the next target, it is scored as a miss. This exercise teaches the soldier to change his magazine quickly and safely by instinct under pressure. In Table V, however, a second magazine change is done in accordance with commands from the control tower.

c. The range to exposed targets does not exceed 31 meters from the firer. Daylight target exposure times are as follows:

|                   | <u>Tables I, II, and III</u> | <u>Tables IV and V</u> |
|-------------------|------------------------------|------------------------|
| Single targets:   | 3 seconds                    | 2 seconds              |
| Multiple targets: | 5 seconds                    | 4 seconds              |

#### A-2. FIRING THE CPQC

The following qualification tables apply for day, night, and NBC qualification. The standing firing position is used throughout the qualification.

**NOTE:** The target sequence is decided by the range OIC but is the same for all lanes. This prevents firers from getting ahead of firers in adjoining lanes. Target sequences vary in distance from the firer, starting with no more than two targets at 7 meters and the farthest targets at 31 meters.

a. Table I. One magazine with seven rounds, and five targets exposed. The standing position is assumed at the firing line with the weapon held at the ready position. Only single targets are exposed to the firer in this table. The tower operator decides the target sequence.

b. Table II. One magazine with one round, one magazine with seven rounds, and six targets exposed. The firer assumes the same position on the firing line as in Table I. There are four single targets and one set of multiple targets exposed to the firer.

- (1) The magazine with one round is loaded into the weapon--one target is then exposed to the firer.
  - (2) After firing the pistol, the firer must change magazines at once. Three seconds after the target appears, the target is lowered if not hit.
  - (3) Eight seconds later, another target appears. Again, the firer must engage this target in the required time or it is scored a miss.
- c. Table III. One magazine with seven rounds is loaded. Five targets (three single and one set of multiple targets) are exposed, and each is fired following the firer's rotation to another firing point.
- d. Table IV. One magazine with five rounds is loaded. Four targets are exposed starting with the same position used in the previous tables. Two single targets and one set of multiple targets are exposed to the firer.
- e. Table V. One magazine with one round, one magazine with seven rounds, and one magazine with five rounds are loaded. Ten targets are exposed. The firer begins 10 meters behind the firing line in the middle of the trail.
- (1) The magazine containing one round is loaded into the pistol. The firer places the magazine containing seven rounds in his magazine pouch where it is closest to the firing hand. The magazine containing five rounds is placed in the magazine pouch farthest from the firing hand.
  - (2) When the firer reaches the firing line, a single target is exposed for two seconds, then lowered if not hit. There is an eight-second delay to allow the firer to change magazines. The seven-round magazine should be loaded at this time.
  - (3) At the end of eight seconds, another single target is exposed to the firer. Again, should the firer not have loaded his second magazine in time to engage this target, it is scored a miss.
  - (4) When the tower operator is sure that the firing line has completed the magazine change, he gives the command MOVE OUT. He then sequentially exposes two multiple targets at various ranges from the firer.
  - (5) After exposure of two sets of multiple targets, the pistol is reloaded with the five-round magazine. The command MOVE OUT is given, and the remaining targets are presented to the firer in sequence. After the last targets are hit or lowered, the weapon is cleared.
  - (6) The firer, holding the weapon in the raised pistol position with the slide to the rear, returns to the starting point and places the weapon on the stand. Excess ammunition is turned in to the ammunition point. The next order moves to the firing line.

### A-3. CONDUCT OF FIRE

For each table, firers are issued only the rounds required to fire that specific table. The following list of commands outlines a step-by-step sequence for conducting range firing on the CPQC.

a. Table I. The tower operator orders firers to move to the firing line in preparation for firing. The tower operator orders firers to position themselves next to the weapon stands and secure their weapons. Magazines containing seven rounds are issued to the scorers and given to the firers. The tower operator commands:

TABLE ONE, SEVEN ROUNDS.  
LOAD AND LOCK.  
READY ON THE RIGHT.  
READY ON THE LEFT.  
READY ON THE FIRING LINE.  
UNLOCK YOUR WEAPONS.  
WATCH YOUR LANE.

The tower operator exposes the targets to the firers. When all targets have been exposed and engaged or lowered, the tower operator commands:

CEASE FIRE.  
CLEAR ALL WEAPONS.  
CLEAR ON THE RIGHT.  
CLEAR ON THE LEFT.  
THE FIRING LINE IS CLEAR.  
FIRERS, PLACE YOUR WEAPONS ON THE STANDS.

b. Table II. The tower operator orders firers to secure their weapons. One magazine of one round and one magazine of seven rounds are issued to the firers. The tower operator commands:

TABLE TWO, EIGHT ROUNDS.  
LOAD AND LOCK.  
READY ON THE RIGHT.  
READY ON THE LEFT.  
READY ON THE FIRING LINE.  
UNLOCK YOUR WEAPONS.  
WATCH YOUR LANE.

The tower operator exposes the targets to the firers. When all targets have been exposed and engaged or lowered, the tower operator commands:

CEASE FIRE.  
CLEAR ALL WEAPONS.  
CLEAR ON THE RIGHT.  
CLEAR ON THE LEFT.  
THE FIRING LINE IS CLEAR.  
FIRERS, KEEP YOUR WEAPONS POINTED UP AND DOWN RANGE.

c. Table III. The tower operator orders the firers to position themselves next to the weapon stands. One magazine of seven rounds is issued to the firers. The tower operator commands:

TABLE THREE, SEVEN ROUNDS.  
LOAD AND LOCK.  
READY ON THE RIGHT.  
READY ON THE LEFT.  
READY ON THE FIRING LINE.  
UNLOCK YOUR WEAPONS.  
WATCH YOUR LANE.

The tower operator exposes the targets to the firers. When all targets have been exposed and engaged or lowered, the tower operator commands:

CEASE FIRE.  
CLEAR ALL WEAPONS.  
CLEAR ON THE RIGHT.  
CLEAR ON THE LEFT.  
THE FIRING LINE IS CLEAR.  
FIRERS, PLACE YOUR WEAPONS ON THE STAND.

d. Table IV. The tower operator orders the firers to position themselves next to the weapon stands. Firers are issued one magazine of five rounds. The tower operator commands:

TABLE FOUR, FIVE ROUNDS.  
LOAD AND LOCK.  
READY ON THE RIGHT.  
READY ON THE LEFT.  
READY ON THE FIRING LINE.  
UNLOCK YOUR WEAPONS.  
WATCH YOUR LANE.

The tower operator exposes the targets to the firers. When all targets have been exposed and engaged or lowered, the tower operator commands:

CEASE FIRE.  
CLEAR ALL WEAPONS.  
CLEAR ON THE RIGHT.  
CLEAR ON THE LEFT.  
THE FIRING LINE IS CLEAR.  
FIRERS, PLACE YOUR WEAPONS ON THE STAND TO THE REAR OF THE FIRING LINE.

e. Table V. The tower operator orders the firers to secure their weapons and move to the center of the trail and 10 meters behind the firing line. Firers are issued one magazine of one round, one magazine of seven rounds, and one magazine of five rounds. The tower operator commands:

TABLE FIVE, THIRTEEN ROUNDS.  
LOAD AND LOCK.  
READY ON THE RIGHT.

READY ON THE LEFT.  
READY ON THE FIRING LINE.  
PISTOLS AT THE READY POSITION.  
UNLOCK YOUR WEAPON.  
WATCH YOUR LANE.  
MOVE OUT.

The tower operator exposes the targets to the firers. He gives the firers the commands WEAPONS AT THE READY POSITION and MOVE OUT after each target or group of targets has been engaged. Upon completion of Table V, the tower operator commands:

CEASE FIRE.  
CLEAR ALL WEAPONS.  
CLEAR ON THE RIGHT.  
CLEAR ON THE LEFT.  
THE FIRING LINE IS CLEAR.  
FIRERS, KEEP YOUR WEAPONS UP AND DOWN RANGE.  
SCORERS AND FIRERS MOVE BACK TO THE FIRING LINE AND PLACE YOUR WEAPONS ON THE STAND.

The tower operator has each scorer total the firer's scorecard and turn it in to the range officer or his representative. The firing orders are rotated and the above sequence continued until all orders have fired.

#### A-4. NIGHT AND NUCLEAR, BIOLOGICAL, CHEMICAL QUALIFICATION FIRING

Night and NBC qualification is required. The qualification tables described in paragraphs A-2 and A-3 also apply for night and NBC qualification. Both qualifications are based on a GO/NO-GO scoring system. To receive a GO at night, the firer must hit at least 5 of the 30 exposed targets in all five tables. Likewise, to receive a GO during NBC firing, the firer must hit at least 7 of the 30 exposed targets in all five tables. A 10-second exposure time is allowed for each target for both night and NBC firing.

#### A-5. ALIBIS

Alibis are fired at the completion of each table from the position where the alibi occurred. Fire commands that apply to the table are used to fire an alibi. If a malfunction of weapon or targets occurs during firing from stationary positions, the firer reports the malfunction, and keeps his weapon pointed up and downrange. Should the malfunction occur during Table V, the firer keeps his weapon pointed up and downrange. He continues to move forward, keeping aligned with the firers to his right and left.

*In the context of the MP (Military Police) Combat Pistol Qualification Course, an "alibi" refers to a situation that may occur during the qualification course when a shooter is unable to engage a target or complete a required shooting stage due to a valid reason. When an alibi is declared, it means the shooter is granted a chance to redo that particular stage or series of shots.*

*The most common reasons for declaring an alibi include:*

1. *Malfunction: If the shooter experiences a malfunction with their pistol during the course of fire, such as a jam or failure to feed, they can declare an alibi and request a chance to reshoot the affected stage.*
2. *Equipment issue: If there is a problem with the shooter's firearm or related equipment that affects their ability to engage targets effectively, they can declare an alibi and request to redo the stage.*
3. *Range safety issue: If there is a safety concern on the range that disrupts the shooter's concentration or ability to perform, such as a loud noise, distraction, or other external factors, they may be allowed an alibi.*
4. *Target malfunction: If there is an issue with a target not functioning correctly, such as not turning or scoring accurately when hit, the shooter can declare an alibi and request to reshoot that specific stage.*

*When an alibi is granted, the shooter will typically be given another opportunity to complete the stage or shots that were affected by the declared issue. It's important to note that the specific procedures for declaring and resolving an alibi may vary depending on the particular MP Combat Pistol Qualification Course and its rules or regulations.*

## A-6. RULES

Rules governing firing the CPQC are as follows:

- a. **Coaching.** Coaching is not allowed during record firing. No person may give or try to give help while the firer is taking his position or after he has taken his position at the firing point. Each firer must observe the location of the target in his own lane. During the instructional firing, the coach and assistant instructors should assist the firer in correcting errors.
- b. **Accidental Discharges.** All shots fired by the firer are scored after he has taken his place on the firing lane. Even if the weapon is not directed toward a target or is accidentally discharged, a replacement round is not issued.
- c. **Firing on the Wrong Target.** Shots fired on the wrong target are entered as a miss on the firing scorecard. A firer is credited only with hits he attains in his own firing lane.
- d. **Firing After the Signal to Lower Targets.** Any shots that are fired by the firer after the target starts to lower are scored as a miss.
- e. **More than One Shot Fired at an E-Type Silhouette Target.** The firer is credited with a hit if the hit is made during the target exposure time. The number of rounds fired to obtain the hit is immaterial.
- f. **Excess Ammunition at the End of a Firing Table.** Excess ammunition from each table is turned in to the ammunition point and not used by the firer for subsequent tables.

g. Target Sequence. The target sequence is decided by the tower operator but is the same for all lanes. This prevents firers from getting ahead of other firers in adjoining lanes. Target sequence will vary in distance from the firer, starting with 31 meters and allowing no more than two 7-meter targets.

#### A-7. SCORECARD

The scorecard outlines instructional firing and qualification firing (CPQC) (Figure A-1). Numbers in column labeled TGT (target) are not the sequence in which targets are exposed. They are the numerical identification of targets to be engaged during each table of fire.

a. Scoring. Each time a target is hit-or-killed, an X is placed in the column labeled HITS. The value of a hit is 10 points. Upon completion of firing the CPQC, the scorer totals and signs the scorecard. Qualification standards are listed in the bottom right corner on the record firing side of the scorecard. They are:

Expert: 260 to 300.

Sharpshooter: 210 to 250.

Marksman: 160 to 200.

Unqualified: Below 160.

NBC and night firing are on a GO/NO-GO scoring system and recorded in the remarks column.

Night: 5 target hits = GO.

NBC: 7 target hits = GO.

b. Supply of Forms. The Scorecard form is available through normal publications supply channels.

#### A-8. TARGETS

Seven electric target device targets and E-type silhouettes for each firing lane are required. Aggressor figures may be superimposed on the silhouettes to add realism to the course of fire.

#### A-9. QUICK-FIRE TARGET TRAINING DEVICE

The QTTD may be procured locally. For durability and appearance, it should be made by the training aids section or an equally capable agency.
